Professional Synopsis

Backend developer with 1 year of professional experience building production APIs, data pipelines, and ERP backends in Node.js and Python. Designed and shipped a financial-analysis platform that ingests XBRL and Excel balance sheets and computes 27+ KPIs for Italian SMEs, plus healthcare and accounting systems serving thousands of records. Strong in database design, query optimization, and test-driven delivery, backed by 200+ unit tests.

Technical Skills

Languages: Python, JavaScript, TypeScript, SQL

Backend & APIs: REST API Development, Node.js, Express.js, Flask, SQLAlchemy ORM

Databases: PostgreSQL, MongoDB, DBMS Design, Query Optimization, Connection Pooling

Testing & Tools: Pytest (Unit Testing), Git, Postman, GitHub, GitLab

Cloud & Integrations: AWS S3, Cloudinary, Twilio

Experience

Backend Developer, Briskcovey Technologies – Jaipur, Rajasthan

Aug 2025 – Present

Razor Clinic: Clinic Management System

razorclinic.com

- Engineered a healthcare ERP backend in Python and SQLAlchemy with ABDM integration for interoperable digital health records, spanning 4 modules and supporting 5,000+ patient records.
- Implemented field-level AES-256 encryption for all PHI across patient records, prescriptions, and lab results, ensuring HIPAA-aligned data-at-rest security across 5,000+ records.
- Automated lab reporting end-to-end with Cloudinary-based report generation and real-time sample tracking, cutting report turnaround from 15 minutes to under 1 minute.
- Integrated Twilio SMS/voice notifications for appointment reminders and prescription alerts; tuned slow analytics queries, improving endpoint response time by 60% (800ms → 300ms).

KBAI: Business AI Platform

kbai.aionsoft.it

- Architected and shipped a Financial Analysis & Business Intelligence backend using Python (Flask), PostgreSQL, and SQLAlchemy for Italian SME balance-sheet processing, computing 27+ KPIs and benchmarking across fiscal years.
- Built a scalable balance-sheet ingestion pipeline supporting Excel (XLSX) and XBRL formats with automated data extraction and S3 cloud storage, processing balance sheets in seconds instead of hours of manual entry.
- Developed a multi-year benchmark engine comparing balance sheets across fiscal years with dynamic KPI status (improving/declining/stable) and goal tracking, surfacing financial trends across 3+ fiscal years.
- Optimized performance with SQLAlchemy ORM query tuning, connection pooling, pagination, and structured logging, backed by 200+ unit tests ensuring data integrity on high-volume financial transactions.

Cablins: HR & Accounting Management System

cablinks.org

- Designed and implemented a scalable accounting backend using Node.js, TypeScript, and MongoDB covering inventory, purchases, invoices, banking, and reporting across 5 modules.
- Built inventory and purchase management services with real-time stock updates, supplier tracking, and tax/discount handling, eliminating manual stock adjustments.
- Automated invoice and revenue systems with calculations for totals, discounts, taxes, payment status, and due-date validation, reducing billing errors and manual effort.
- Delivered cash-flow and account-statement reporting integrating bank transactions, invoices, purchases, and journal entries with period-based filtering and audit-friendly APIs.

Education

Master of Computer Applications, Vivekananda Global University, jaipur

Sep 2025 – Jul 2027

Bachelor of Arts, University of Rajasthan, jaipur

Aug 2021 – Jul 2024
